PROFILE

Full Stack Developer experienced in building and shipping web applications. I work across the stack, from performant frontend interfaces to backend services and APIs, with a strong focus on quality and adaptability. I enjoy solving real-world problems and collaborating in remote teams. Currently focusing on Node.js and NestJS, while exploring Web3 and Solidity.

EXPERIENCE

Software Developer · Chabit

Sept. 2025 – Present · Hybrid

- Led the development of the company website using Astro and React, designing a scalable and performance-optimized architecture.
- Implemented 3D visual experiences and advanced animations with Three.js, Spline, and GSAP, applying lazy loading and resource optimization strategies.
- Collaborated on UX/UI decisions ensuring visual and technical consistency between design and development.
- Maintained direct communication and frequent meetings with the client's CEOs (Spain), participating in product decisions and clearly conveying technical progress.
- Developed an internal UI component library using React and React Native, documented with Storybook and distributed as a private package via GitHub Packages, used across the company's applications.

Frontend Developer · Primarket

Jul. 2025 – Present · Remote

- Participated in Scrum teams developing and implementing web interfaces with Next.js and Material UI.
- Built reusable components based on team specifications and feedback.
- Developed scalable views, optimized performance, and ensured responsive and accessible layouts.

Frontend Developer · Freelance

Apr. 2024 – Jun. 2024 · Remote

- Full UX/UI design of the website, defining colors, typography, structure, and user experience.
- Frontend development with Astro, TypeScript, and Tailwind CSS.
- Performance, image, and SEO optimization. Direct communication with the client.

Full Stack Developer · Professional Internship

Mar. 2023 – Dec. 2023 · On-site

- Developed a website using Next.js, Tailwind CSS, and TypeScript.
- Built an interactive catalog to visualize the country's tech education offerings.
- Implemented an interactive map with Leaflet and developed a REST API using Node.js and Express.

PROJECTS

Exactamente · exactamente.com.ar

React, Astro, Tailwind CSS, Node.js, Hono, Drizzle ORM, PostgreSQL

- Collaborative platform for university students to search, share, and manage academic resources — built and maintained solo.
- Actively used by 200+ students per day with over 4,000 resources uploaded across the community.
- Currently scaling the system to support multiple universities, optimizing performance and architecture for a growing user base.

EDUCATION

Systems Engineering

Universidad Nacional del Centro de la Provincia de Buenos Aires · 2024 – Present

Technical Degree in Computer Programming

Escuela Técnica N.º 2 Ing. Felipe Senillosa · 2020 – 2023

TECHNOLOGIES & TOOLS

Languages: TypeScript, JavaScript, Go, HTML, CSS
Frontend: React, Astro, Tailwind CSS, Material UI, Zustand, React Native, React Hook Form, Axios, CVA

Backend: Node.js, NestJS, Express
Animation & 3D: Three.js, GSAP, Spline
Tools: Git, GitHub, Vercel, Figma, Vite, Storybook, Notion
Web3 / Blockchain: Solidity, Ethereum, smart contracts (learning)
Other: Java, C++, Shell scripting (Bash), REST APIs, clean architecture
